

PROPA-UD500

- Hear your own sound from under the dome speaker.
Adjust the volume, Connect with Bluetooth
When the surroundings are noisy, you can hear the sound only under the speaker.
- If the surroundings are quiet, you will hear a small sound due to the reflection sound even outside the speaker.
- PROPA-UD500S has a sensor which detects humans so it operates only if there is a person under it. Therefore, noise problem can be totally solved.

Specifications
